Group-gap joint p: days 0 to +5	0.947	0.956	0.751	0.950
Daily observations	174046	174046	174046	174046
Announcements / clusters	15830	15830	15830	15830
Companies	4108	4108	4108	4108
Announcement FE	Yes	Yes	Yes	Yes
Group-specific event-day FE	No	Yes	No	Yes
Group-specific calendar-date FE	No	No	Yes	Yes
Financial / continuous ES controls	No	No	No	No

Coefficients and announcement-clustered standard errors are multiplied by 100. Outcome: log price, relative to day -1; not CAR[-1,0]. Good: ES > 10%; neutral: -10% to +10%; ES < -10% excluded. Models use identical daily observations within each period. No matching, ever-Big4 pool restriction, restructuring exclusion, or winsorization. Stars: *** p<0.01, ** p<0.05, * p<0.10; based on unrounded p-values. Frozen estimates from November 3, 2026.
