Workload availability: first stage

Successor attribute	Negative prior workload instrument	Coefficient (SE)	First-stage F / N
Advanced human capital	z_workload_advanced_hc	0.007 (0.009)	F=0.653; N=1,329
Zero prior failure	z_workload_zero_fail	0.073** (0.029)	F=6.196; N=956
Zero prior restatement	z_workload_zero_rest	0.001 (0.069)	F=0.000250; N=962
Zero prior violation	z_workload_zero_viol	0.083** (0.035)	F=5.532; N=956

Notes: Prior workload is measured before successor assignment. Each row is a separate first-stage design; the advanced-human-capital specification has no exported second stage. Audit-firm and rotation-year fixed effects; audit-firm-clustered standard errors.
