Analysis	Source code	Current output status
Cross-listing and overseas auditors	10_market_entry/11_crosslisting_auditor_choice.do	Overall and full-sample overseas-auditor figures updated early on September 27. The first H-share subgroup figure failed to export. Specifications excluding finance and real estate retain the valid September 26 afternoon outputs.
Branch expansion	10_market_entry/13_big4_branch_entry.do	The current run stopped upstream. Four figures retain valid September 26, 19:14–19:18 outputs. See Section 6.2 for the actual event window.
Foreign controllers and ownership relations	10_market_entry/10_foreign_demand_auditor_choice.do, Stages 2–3	Rerun on September 26 at night; updated TWFE and CS-DID layouts. The module log reached its end at 23:45.
WTO exposure	20_network_spillovers/22_supplychain_adoption_variants.do, Stage 1	All six figures have export records in the September 25, 2026 log. Definition limitations are discussed in Section 4.5.
Early Big 4 clients	code/python/06_financial_report_preprocessing_analysis.ipynb, Section 12	Python descriptive outputs; separate from the Stata market-entry module.
