Exposure group	Treatment definition in current code	Comparison group and limitations
Coastal: treat_coast	Registered in one of 11 coastal provincial-level regions in any observed year; firm-level full-period maximum.	Other firms. Missing province is coded as zero and must be distinguished from a confirmed inland location.
Openness: treat_open	Registered-city imports plus exports divided by GDP in 2003 exceed 1 (100%) in any matched record.	Matched values at or below 1 form the comparison group. Firms with all values missing are excluded.
Overseas joint venture: treat_ overseas_jv	dummy_overseas_jv equals 1 in any observed year.	Firms never flagged. The full-period maximum includes post-WTO information.
OECD joint venture: treat_oecd_jv	dummy_oecd_jv equals 1 in any observed year.	Firms never flagged for OECD joint ventures; this does not imply no overseas business.
US/EU/Japan/Korea joint venture: treat_us_eu_jv	dummy_us_eu_jp_kr_jv equals 1 in any observed year.	The filename omits Japan and Korea. Classification includes post-WTO information.
Transport: treat_trade_transport	Industry code G55, G56, G58, or G59 in any observed year.	Other industries. Full-period industry classification is not necessarily predetermined before WTO entry.
