Strict Sample: Low-Failure AKM A1

Outcome	Exactly five years	Shorter tenure	Difference p / N
Panel A: Upgrade			
	-0.061***	-0.061***	p=0.990
Any failure	(0.017)	(0.007)	N=27,559
	-0.045***	-0.036***	p=0.556
Restatement	(0.015)	(0.005)	N=27,559
	-0.036**	-0.035***	p=0.976
Violation	(0.017)	(0.006)	N=27,559
Panel B: Downgrade			
	-0.062***	-0.063***	p=0.995
Any failure	(0.022)	(0.012)	N=22,245
	-0.025	-0.037***	p=0.498
Restatement	(0.015)	(0.010)	N=22,245
	-0.044**	-0.044***	p=1.000
Violation	(0.019)	(0.010)	N=22,245

Notes: Coefficients are on Q=1 (low-failure auditor), in probability units. For a 1-to-0 downgrade, the implied post-minus-pre change is minus the coefficient. Client and year FE; client-clustered SE in parentheses. Stars test each coefficient against zero; the last-column p tests equality across rotation types. *** p<0.01, ** p<0.05, * p<0.10.
