p	0.2512	0.5166	0.3197	0.6279	0.7152	0.9584
Event-day controls	No	Yes	No	Yes	No	Yes
Daily observations	223,640	223,607	222,375	222,342	177,188	177,188
Firm-by-year FE	Yes	Yes	Yes	Yes	Yes	Yes
Event / trading-date FE	Yes	Yes	Yes	Yes	Yes	Yes

Notes: One dynamic regression per sample and control specification. The rows are selected event-day contrasts. Controls are log market capitalization, market-to-book and log forecast count interacted with event day. The public-date and common-support checks do not change the main forecast timing rule. Clustering is by firm-fiscal-year.

Standard errors are in parentheses. * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.
