Pre-Announcement Joint Tests: Full Sample

Fitted model	(1) Big4 only	(2) Local 8 only	(3) Other only	(4) Joint interaction
Within-group joint p	0.4285	0.4164	0.3330	–
Big4 - Other joint p	–	–	–	0.0598
Local 8 - Other joint p	–	–	–	0.4413
Big4 - Local 8 joint p	–	–	–	0.0667
Daily observations	28,223	121,665	74,147	224,432
Event clusters	2,574	11,069	6,752	20,408

Notes: One saved regression per column. The tests jointly set the day -5, -4, -3 and -2 coefficients to zero, relative to day -1. The three pooled contrast tests share column (4). These are p-values, not coefficients; no significance stars are added. Original firm-fiscal-year clustering is retained.
Standard errors are in parentheses. * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.
